

Final Project: A Lightweight, Procedural, Vector Watercolor Painting Engine

B.S.C.S. Franci Suni Lopez

Overview

- ◇ The goal is not to exactly duplicate watercolor painting, but to create a range of dynamic behaviors that allow users to achieve a similar style.

Overview

Splat configurations

- ◇ Simple
- ◇ Wet-on-dry
- ◇ Wet-on-wet
- ◇ Blobby
- ◇ Crunchy

Splat motion

- ◇ Each splat's motion is dictated by a per-vertex velocity, a splat bias, and a global gravity.

- ◇ Initial configuration

- ◇ After advection.

- ◇ After boundary resampling.

Stamp

- ◇ The vector output of a brush stroke made from left to right.
- ◇ 195 splats.

Implementation

- ◇ No source code available.
- ◇ OpenGL
- ◇ Goals:
 - 1) Splat configurations
 - 2) Splat effect
